

H₂ OHHH!

SINGLE USE PLASTIC WATER BOTTLES ARE ONE OF THE LARGEST POLLUTANTS TO OUR LANDS AND OCEANS.

US landfills are overflowing with more than two million tons of discarded single use water bottles. That's hard to imagine!

HOW BAD IS IT?

= 1 TON

It's like having two million VW Beetles worth of plastic in our landfills!

WHAT ARE THE FACTS?

1. It takes **3 times** more water to make single use water bottles as it does to fill them.
2. Americans throw away **35 billion** empty water bottles a year. Of those, only **12 percent** are recycled.
3. It takes almost **2,000 times** the energy to manufacture a bottle of water than it does to produce tap water.
4. Each week, it takes **40,000 18-wheeler trucks** on our roads just to deliver bottled water.

DID YOU KNOW?

More than 25% of single use plastic water bottles are filled with tap water.

TAKE THE PLEDGE...

I pledge to use a refillable water bottle instead of a single use plastic bottle.

Using a refillable water bottle is one of the easiest things we can do to reduce our trash production. Take the pledge today and start reducing your waste!
